**PRINSPORT (PRIN) – Mini White Paper**

**1. Overview**
PRINSPORT (PRIN) is a utility token built on BNB Smart Chain (BEP-20), designed to facilitate digital payments, merchant incentives, and value exchange within the PRINSPORT ecosystem.

**2. Utility**
PRIN is used as a medium of exchange between merchants and customers, enabling payments, discounts, incentives, and free trading on decentralized exchanges such as PancakeSwap.

**3. Tokenomics**
Token Name: PRINSPORT
Symbol: PRIN
Max Supply: 100,000,000 PRIN
Circulating Supply: 4,000,000 PRIN

**4. Liquidity**
Initial liquidity was added on PancakeSwap V2 and partially locked using UNCX to ensure transparency and market stability.

**5. Security & Transparency**
The smart contract follows BEP-20 standards with no additional minting functions or hidden fees. All data is verifiable on-chain.

**6. Vision**
PRINSPORT aims to become a simple, transparent, and scalable digital payment solution for real-world merchants.
